Take the credit – and help underprivileged students attend a school that best meets their needs. Companies that partner with Step Up For Students can fund K-12 scholarships for lower-income children in Florida with dollar-for-dollar tax credits through the Florida Tax Credit (FTC) Scholarship Program. Up to 100% of a company’s liability is eligible. With K-12 scholarships worth around $7,000, your company’s tax liability can make a big difference in the lives of Florida students.

RESERVE

Easily enroll online with the Florida Department of Revenue’s online application. Companies may apply for credits more than once and will be approved if credits are available in the funding cap. Reserving credits does not oblige a company to remit the funds – it is merely a way for the Florida DOR to ensure the annual maximum in tax credits is not oversubscribed.

REMIT: Credits & Estimated Payments

Payments are made directly to Step Up For Students via check, wire or ACH. Upon receipt, Step Up provides a Certificate of Contribution. Payments must be remitted before filing the annual tax return to qualify for the tax credit and may be used to offset any installment tax payment amount required to meet the prior year exception (see TIP 19B8-01). Any state tax liability remaining after the credits are reserved should be paid as normal estimated tax payments to the Florida DOR.

One hundred percent of an eligible contribution is allowed as a credit against any tax due for a taxable year after deducting from such tax: 1) Deductions for assessments made pursuant to Section 440.51, Florida Statutes (F.S.) - Workers’ Compensation Administrative Assessments; 2) Credits for taxes paid under Sections 175.101 and 185.08, F.S. - Firefighters’ and Police Officers’ Pension Trust Funds; 3) Credits for income tax paid under Chapter 220, F.S.; and 4) Credit allowed under Section 624.509(5), F.S., as such credit is limited by Section 624.509(6), F.S., the 65% limitation.

Theoretically, if a taxpayer’s earned tax credits equal or exceed 81% (27% x 3) of the net tax due, then the taxpayer may fully avoid any underpayment of installment payments. For example:
